OUR STORY

EXPERIENCE THE FUTURE OF WALL CLADDING

INTRODUCING INNOVATIVE WALL CLADDING SOLUTIONS: ELEVATE YOUR SPACE WITH STYLE AND FUNCTIONALITY.

Welcome to the Clicklad™ catalog, where revolutionary aluminum wall cladding systems meet the future of design and functionality.

Our commitment to innovation has led us to develop a patented technology that sets our cladding solutions apart from the rest. Over the past years, Clicklad™'s team of architects and engineers have worked hard and specialized in creating the most innovative aluminum cladding systems available across Canada.

Clicklad™'s goal is to make 100% aluminum products accessible for every home, individual, or business for an installation with the highest quality product for one's investment. With an unwavering commitment to quality, design, and functionality, we present a range of versatile aluminum cladding solutions that redefine interior and exterior spaces.

MAJOR ADVANTAGES

WHY CHOOSE CLICKLAD™?

Our patented wall cladding system represents the pinnacle of cutting-edge engineering and design. Developed by our team of experts, this proprietary technology has been carefully crafted to address the limitations of traditional cladding methods while offering a range of unmatched advantages.

100% RECYCLABLE

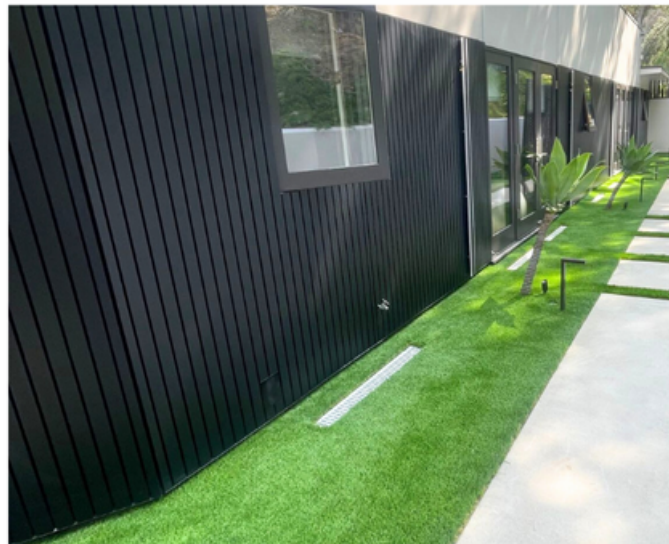

Clicklad™'s products are made from recycled 6063 aluminum so all our products are environmentally friendly.

NON-COMBUSTIBLE

Clicklad™'s products are non-combustible and can be installed in low and high-rise buildings according to Canadian Laws.

ENHANCED DURABILITY

Our 100% aluminum panels incorporate materials that are resistant to weather, moisture, and rust.

RESISTANCE TO UV RAYS

Aluminum cladding panels can resist the damaging effects of UV rays, ensuring that the exterior finish maintains its color and appearance over time.

ZERO MAINTENANCE

Our patented system's robust design minimizes the need for upkeep, saving you time and resources in the long run.

ENHANCED INTERIORS

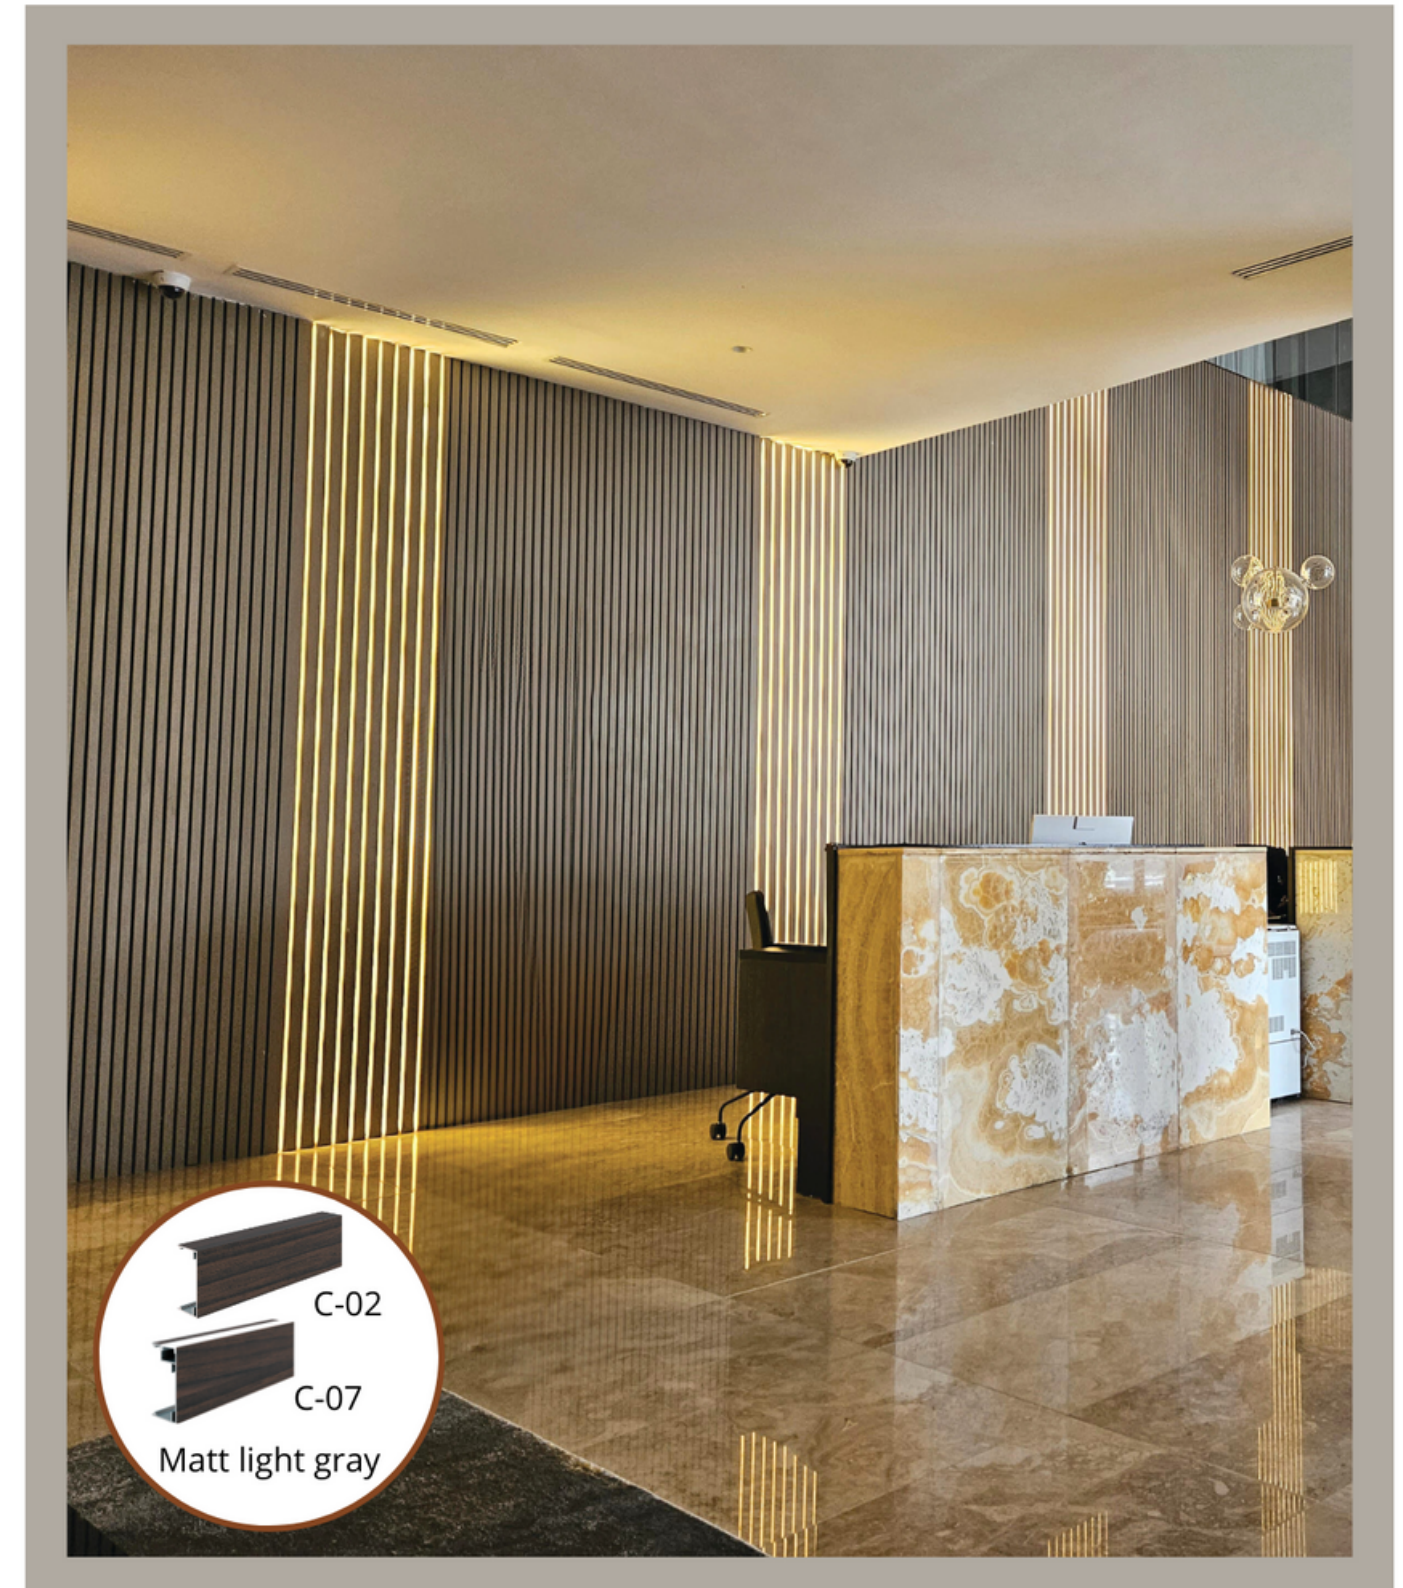

USING CLICKLAD™ PANELS FOR INTERIOR SPACES OFFERS SEVERAL ADVANTAGES, MAKING THEM A POPULAR CHOICE IN COMMERCIAL AND RESIDENTIAL DESIGN:

Customization: Clicklad™'s panels can be easily customized in terms of size, shape, and color. This allows architects and designers to create unique and innovative interior spaces tailored to their clients' preferences.

Environmental Benefits: Aluminum is a recyclable material, making it an eco-friendly choice and can further reduce the environmental impact of construction projects.

Sound Insulation: Aluminum panels can provide sound insulation properties, reducing noise transmission between rooms. This is particularly valuable in commercial and residential settings where noise control is essential.

Mold Resistance: Aluminum is resistant to moisture and humidity, making it suitable for use in kitchens, bathrooms, and other areas prone to moisture exposure.

SMART EXTERIORS

CLICKLAD™'S PANELS OFFER SOME KEY BENEFITS FOR EXTERIOR WALLS IN BOTH RESIDENTIAL AND COMMERCIAL CONSTRUCTION PROJECTS:

Weather Resistance: Aluminum is highly resistant to weathering and corrosion. It can withstand exposure to rain, snow, sunlight, and other environmental elements without deteriorating or losing its structural integrity.

Little upkeep: Aluminum cladding doesn't need painting or sealing, and routine cleaning with water is usually sufficient to keep it looking pristine.

Lightweight: Aluminum is a lightweight material, making it easier and more cost-effective to transport and install compared to heavier building materials. This leads to lower installation costs.

Resistance to Insects and Pests: Unlike wood, aluminum is not susceptible to insect infestations, which can be a concern in some regions.

EXCEPTIONAL AESTHETIC VERSATILITY

Transform ordinary spaces into extraordinary showcases of design with our diverse selection of wall cladding profiles. Whether your preference is for sleek minimalism, rustic charm, or modern elegance, we have profiles that cater to every style and taste.

FINISHES

All Clicklad™'s products are powder-coated to high industry standards. Applied as a free-flowing, dry powder, it is typically administered through an electrostatic process. Renowned for its exceptional durability, it stands out as the superior choice for painted metals. At Clicklad™, we exclusively employ this method to ensure the highest premium quality of products.

CLIP 2" LED C-07

CLIP 4" C-011

ALUMINUM CORNERS

SKU: A-028, A-048, A-108, A-148

Description: Aluminum corners are sold in units according to the relevant size for the selected clip cladding.

SKU: C-019

Description: The corner trim features an ultra-thin profile, rendering it nearly imperceptible, and delivers an immaculate finish. It is designed to seamlessly integrate with our siding system.

Trim Click Finish

SKU: C-058 & C-059

Description: Finish click trim for low click rail, use for the end wall, windows opening, door opening, or any opening needed to finish your siding perfectly.

Same Line Finish

SKU: C-054

Description: L shape angle 1"x1" same height as the system. Installs for a clean-look finish.

INNOVATIVE CLADDING

EMPOWERMENT THROUGH DESIGN

REDEFINING EXCELLENCE THROUGH PATENTED INGENUITY

At Clicklad, we believe that every space has the potential to transcend the ordinary. That's why we've meticulously crafted our patented wall click cladding system—a culmination of innovation, aesthetic finesse, and unparalleled ease of use and maintenance.

Discover the advantages of our patented wall cladding system today. Explore our website and embark on a journey to redefine your spaces with a blend of sophistication and functionality that only Clicklad can provide.
